

Environmental Policy

Marshall Agroecology Limited

Updated: 17 November 2008

Objective:

To minimise resource use and waste and maximise recycling

Transport:

Use diesel vehicle or public transport

Air travel – as necessary

Only make business trips when there is no other alternative: e.g. use teleconferences with colleagues in other parts of the world

Office and field equipment:

Use recycled paper

Used paper to go for recycling

Switch off equipment when it is not being used

Switch off lights in empty rooms and corridors

Make the most of natural light

Do not turn heating up unless it is necessary

Ensure equipment is properly maintained

Use local suppliers, wherever possible

Use paper-free administrative processes, wherever work can be carried out online

Select raw materials which are more readily recyclable

Consider steps for “carbon offsetting”, e.g. planting trees
